Owner: Arch Coal, Inc.  
Location: Elkview Coal Preparation Plant,  
British Columbia, Canada  
Project: Preparation plant and  
loadout facility  
Construction: 2011  
In Service: 2012  
Total Value: \$4.0 million

In 2011, we were contracted to detail and fabricate all the required structural steel for a new preparation plant and loadout facility. This included structural steel columns, beams, bracing, bins and plate work, miscellaneous steel, handrails, platforms, and grating, as well as a multi-coat paint system.

When completed, this project featured approximately 3 million pounds of structural steel. Our Canadian Welders Bureau (CWB) certification was a requirement.
